My name is [name of enumerator] and I would like to interview your household for a survey that is being conducted by researchers from the Center for Economic and Social Development (CESD), Michigan State University and the International Food Policy Research Institute. We have conducted the Rural Economy and Agriculture Dry Zone survey in the previous March and April 2017. The researchers have visited 1,600 households in four different townships: Butalin, Myittha, Magwe and Pwint Phyu. This survey aims to provide researchers with a detailed understanding of value chain process in Dry Zone and carry out analyses to assist policymakers in identifying policies to promote welfare in Myanmar. Now the researchers are visiting 1,500 enterprises/households in some township of Dry Zone and your enterprise/household was selected randomly for participation. The interview will take up to 2 hours to complete and you may be asked to show us your enterprise. You have the right to not participate or stop the interview at any time. Please note, however, that we value your participation. Be assured that the information you give will be held in the strictest confidence and in no circumstance will your household be identified. If you have questions or concerns about your role and rights as a research participant, or if you would like to receive more information about this study, you may contact, anonymously if you wish, Kyan Htoo of the Centre for Economic and Social Development at 09 2500 64 347.
